

Office Furniture Collection

THE DESIGN COMPANY

Ebony & Ivory is a design company that was established in Cairo, Egypt in October 1997.

At the early beginnings, the company was focused on designing interiors with a scope of work that covered both residential and contract spaces. Throughout the years, due to Ebony & Ivory's passion for design, creation and experimentation the company's scope of work evolved into a broader range that currently includes furniture design, furniture production, interior architecture, and general architectural project consultancy.

At Ebony & Ivory we truly believe in teamwork, living in the present moment and listening carefully to our clients' operational and functional requirements, as well as their aesthetic preferences.

Our style and design philosophy have been changing over the years, constantly evolving into an updated version. If there is a constant throughout the evolution process with Ebony & Ivory's paradigm of thought that would be the ongoing challenge to embrace change and endorse fusion.

THE FACTORY

Located in the 10th of Ramadan industrial city, our factory is a furniture production facility that specializes in residential furniture, contract furniture, hospitality, and office furniture. The facility is built on a land plot with an area of 3600 sqm, with a total built up area equivalent to 5000 sqm including offices and stores.

The factory is divided into four divisions: the machinery division, the carpentry division, the wood staining and finishing division and the upholstery division. The facility is well laid out and designed to produce high quality products, with the capability of working on our standard products (Alphabet Home and Alphabet Office) while keeping two full production lines free for custom made hospitality projects.

We are also capable of offering prototyping services for other design houses, as well as working on bespoke fitted furniture.

THE STORY BEHIND

Alphabet is a Cairo-born furniture brand, conceived by Ebony & Ivory Design Studio through the process of tailoring bespoke pieces for specific clients and projects. Eclectic and versatile by nature, the collection draws inspiration from the experience of living in Cairo today; vibrant, layered, and ever-evolving.

Since 2004, Ebony & Ivory's furniture design department has been dedicated to product development and creative collaboration with renowned designers, continuously enriching the collection.

The Alphabet Office line was created to meet the needs of companies seeking distinction in a market dominated by conformity. Our ambition was to reimagine the office, not as a soulless corporate shell, but as a space that breathes, inspires, and connects. A place where design brings warmth, character, and a sense of belonging.

Our vision is to keep evolving in the field of product design, consistently offering original creations defined by superior quality and craftsmanship.

New pieces are currently in development, with ongoing experimentation pushing the boundaries of form and function.

Workbench Line I

Workbench Line I

Designed by: Ebony & Ivory Design Studio.

Presented: *Workbench Line I*
Face to face module for 4 people, black base with wood finish top.

The Work Bench Line 1 is a modular bench system featuring diverse sizes, angles, and shapes, offering designers the freedom to create dynamic open-space work halls, managerial setups, and private offices. This line's standout feature lies in its meticulously engineered metal components, ensuring robust mechanical fixation for enhanced durability and functionality. Attention to detail defines this system, with features such as optimized cable management to minimize clutter and maintain a clean, organized workspace. Work Bench Line 1 is designed to foster teamwork, interaction, and productivity, making it an ideal solution for modern work environments.

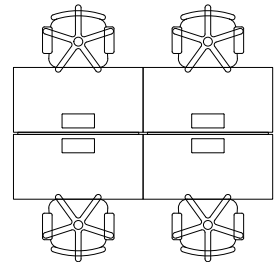

Materials : *MDF with high-pressure laminate and 2mm PVC trim, metal base and structure with an electrostatic finish.*

Workbench Line II

Designed by: Ebony & Ivory Design Studio.

Work Bench Line 2 is a modular bench system featuring diverse sizes, angles, and shapes, offering designers the freedom to create dynamic open-space work halls, managerial setups, and private offices. The main difference between this line and Work Bench 1 is that the drawer units are fixed, forming an integral structural element of the station and reducing the possibility of a messy look to the open space work environment. This line's standout feature lies in its meticulously engineered metal components, ensuring robust mechanical fixation for enhanced durability and functionality. Attention to detail defines this system, with features such as optimized cable management to minimize clutter and maintain a clean, organized workspace. Work Bench Line 2 is designed to foster teamwork, interaction, and productivity, making it an ideal solution for modern work environments.

Wilga

Designed by: Ebony & Ivory Design Studio.

The shape of this work station is dictated by its name, the old Wilga flying plane. The side view of the station is rendered with wooden buttons instead of visible bolts as seen in the original air plane. The middle spine has a wooden element that houses all electrical outlets, topped by either glass separators or fabric screens.

Wilga

Materials : *MDF with high pressure laminate and 2mm PVC trims, metal base and structure with electrostatic finish.*

FACILITY

Factory

Designed by: Ebony & Ivory Design Studio.

As the name of the station suggests, this line is fully built out of circular metal pipes, the structure also allows having the middle separators function for task lighting, screens could be added for privacy if needed. Factory is a modular workstation with different sizes and layout possibilities, fully equipped with cable trays and risers.

Materials:
MDF with a natural wood veneer,
water base finish, metal structure with an electro-static coating.

Technical Specifications

A versatile storage solution available as a sideboard or a vertical shelving unit. Ideal for breaking the monotony of traditional office storage. Adds visual relief in office layouts by replacing redundant storage units. Can act as a partition, dividing a space into distinct zones for better space identification. This shelving unit is designed for both functionality and aesthetic appeal, enhancing modern office environments.

Materials: *MDF with a natural wood veneer, water base finish, metal structure with an electro-static coating.*

Match Box Shelving Unit

Designed by: Ebony & Ivory Design Studio.

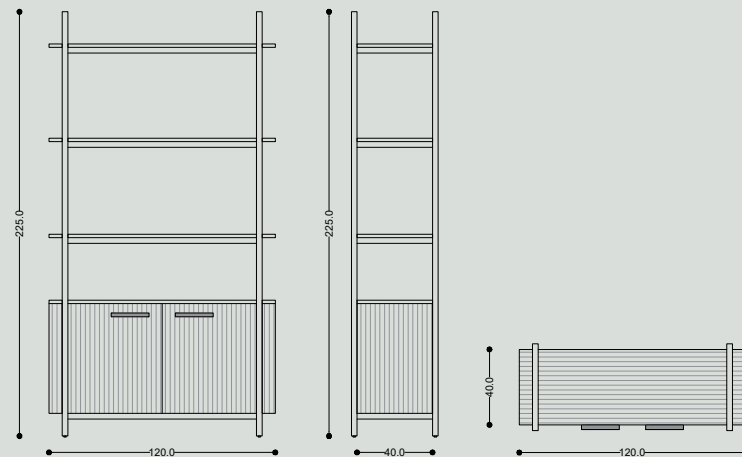

An alternative storage unit available either in the form of a sideboard or a vertical shelving unit. Matchbox could be used within the office layout to break the redundancy of the typical office storage units at certain areas, offering a bit of a visual relief. They could also be both used in the middle of a space dividing it into two zones, creating a visual partition for space identification.

Match Box Shelving Unit

Technical Specifications

Materials: *MDF with a natural wood veneer. metal structure finished with an electro-static coating.*

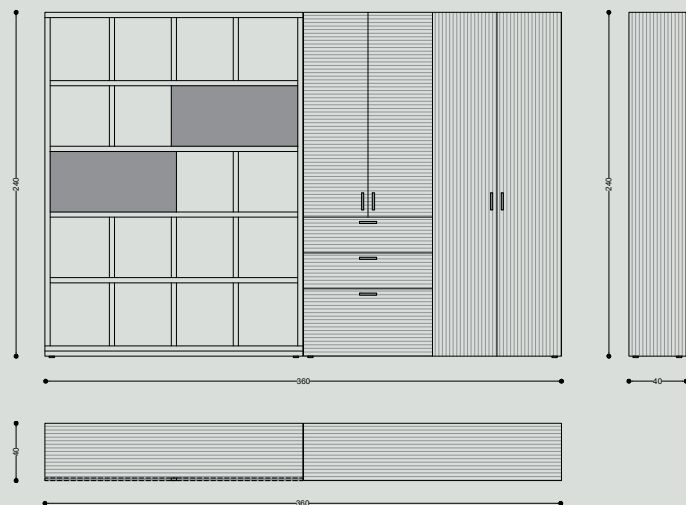

Grid

Designed by: Ebony & Ivory Design Studio.

An elegant modular storage unit, composed of an array of open and closed compartments with sliding doors. At times it could also be used as a space separator to divide an open plan, it could serve as the divider between a meeting area and the actual desk space within an executive suite for instance, while still providing shelving and storage at the same time, serving both divisions at the same time.

Technical Specifications

Grid

Materials: *MDF with natural wood veneer, water base finish.*

Cornfield

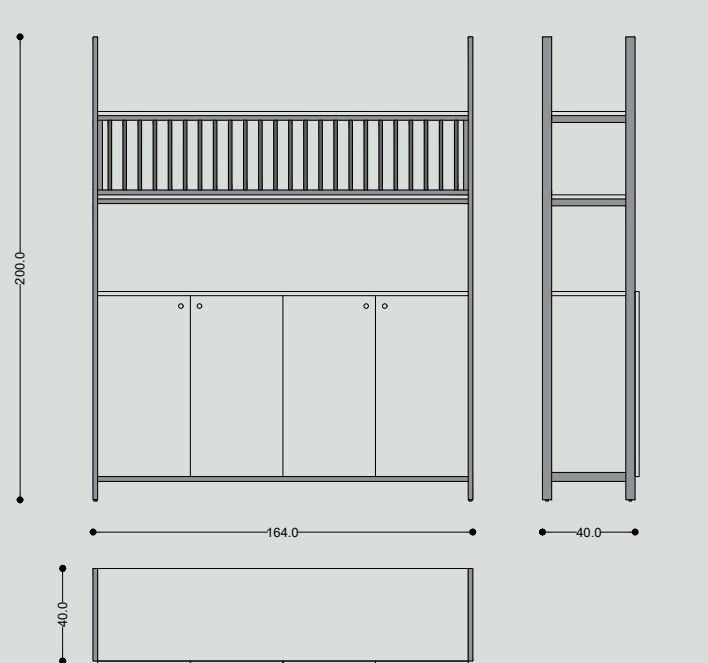

Designed by: Ebony & Ivory Design Studio.

A beautiful vertical unit with open shelves and closed compartments. The solid Beech supporting structure makes it look more of a fine furniture piece rather than a typical office furniture storage unit. Cornfield shelving could be either used within the same space with the Cornfield stations or separately within an office lounge or a break out area.

Technical Specifications

Cornfield

Materials : Solid Beech wooden frame and legs, MDF with high pressure laminate and 2mm PVC trims.

Factory

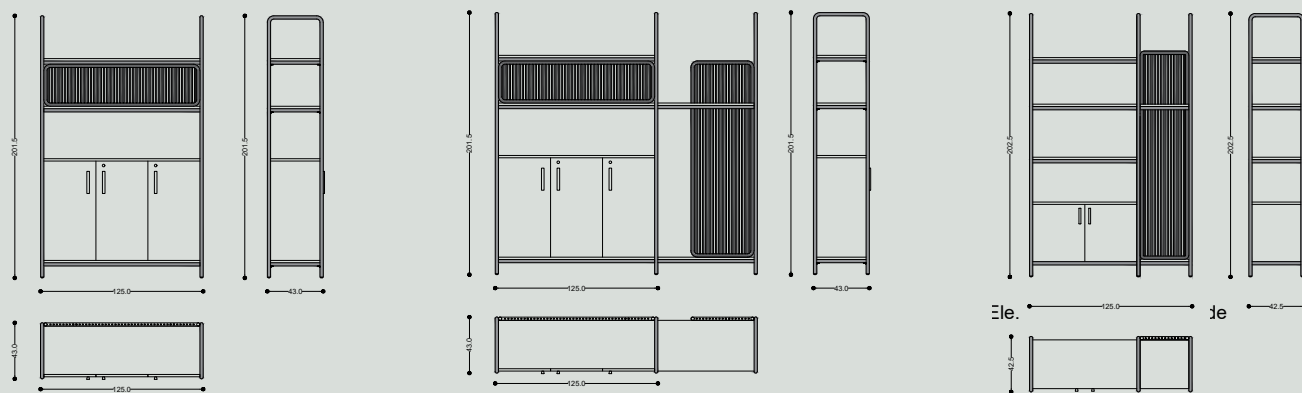

Designed by: Ebony & Ivory Design Studio.

Architectural storage cabinets composed of a tubular metal structure holding closed cabinets and open shelves. Besides the obvious functional aspects of the units they also adds an aesthetic feature to the office space. Available in a number of finishes and configurations.

Technical Specifications

Factory

Materials : *MDF with high pressure laminate and 2mm PVC trims, metal base and structure with electrostatic finish.*

Cocoon

Designed by Ebony & Ivory Design Studio.

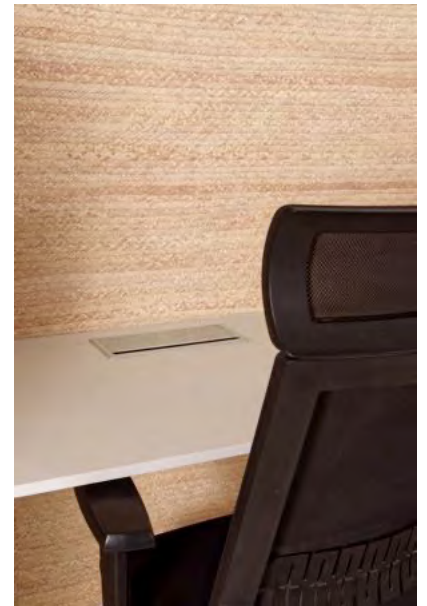

A new Panel system concept with its structure made entirely out of solid Beech wood, covered in straw mats with sound damping material stuffed inside. The concept is to create an earthy workstation using local materials that totally encapsulates the work space with privacy and functionality.

Cocoon

Materials: Solid Beech structure, rockwool stuffing for sound insulation, straw mats, MDF with high pressure laminate and 2mm PVC trims, metal cable runners.

Eternal Flower

Eternal Flower

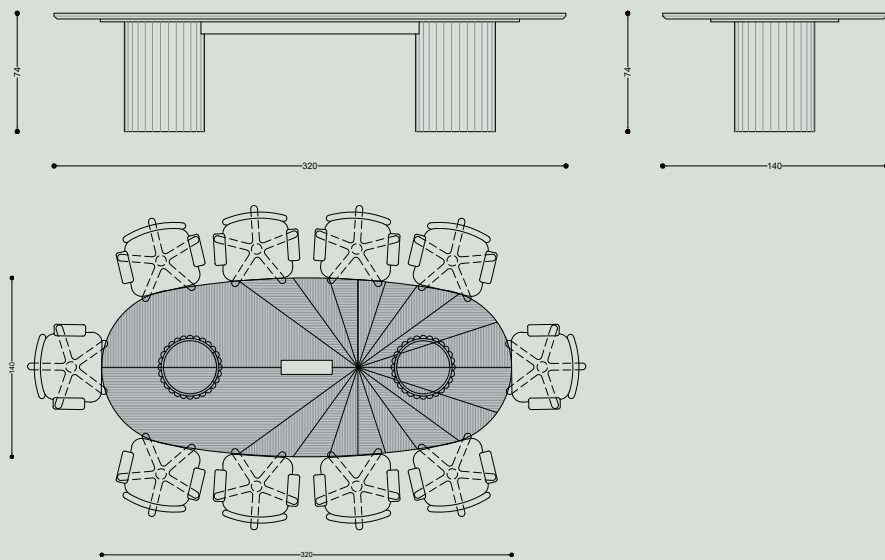

Designed by: Ebony & Ivory Design Studio.

A rich and playful board meeting table with a skillfully patterned surface made of natural Oak veneer, while the base is looking like tree trunks composed of solid Beech circular strips. The design of the table is formal yet cheerful, projecting an elegantly informal appearance. The infrastructure of the table is fully equipped with trays for power intercept units and cabling.

Technical Specifications

Eternal Flower

Materials: *MDF with natural wood veneer, water base finish, table base with solid beech wood.*

Cone

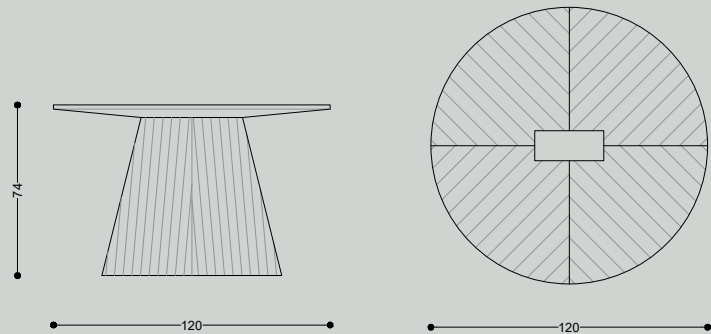

Designed by: Ebony & Ivory Design Studio.

A small round meeting table with a diameter ranging from 90cm - 120 cm , making it suitable for managerial rooms as well as small meeting rooms. The base of the table is conical with a metal base underneath for added stability. The hollow base structure provides support as well as enables cabling to reach the top surface . Base could be either painted or veneered, while the surface is always covered with natural Oak veneer, adding richness to the space where it gets located.

Technical Specifications

Cone

Designed by: Ebony & Ivory Design Studio.

Materials: *MDF with natural wood veneer, water base finish, metal base plate with electrostatic finish.*

Wing

Designed by: Ebony & Ivory Design Studio.

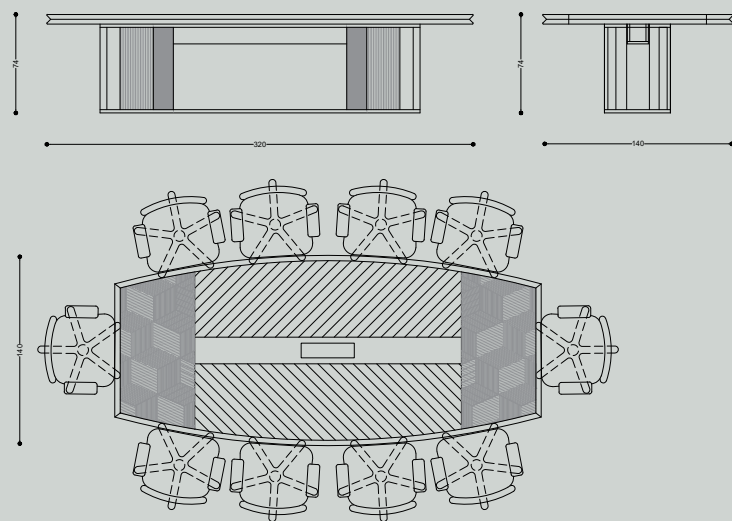

A luxurious meeting table with a design that mixes elements of creativity, practicality and comfort all in one. With its wooden patterned finish, design oriented base and two access doors for cable management this table is quite a center piece that adds sophistication to the board meeting Room.

Wing

Technical Specifications

Materials: MDF with natural wood veneer, water base finish.

Scale

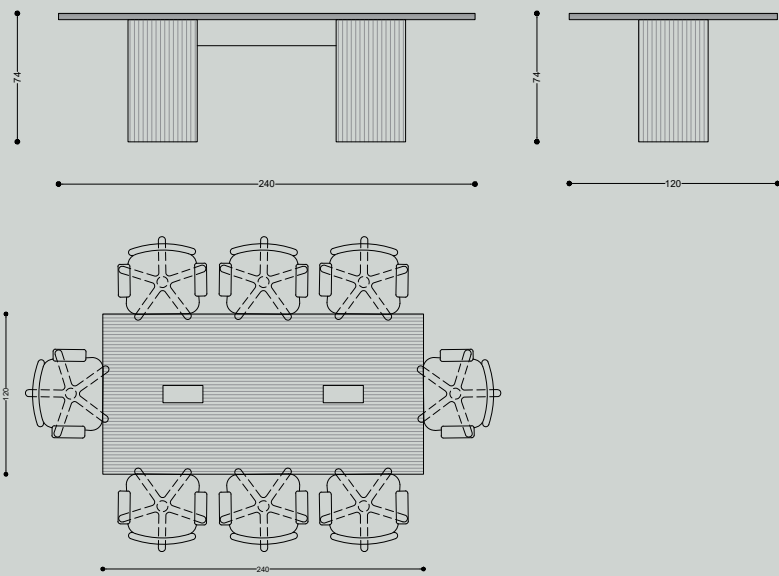

Designed by: Ebony & Ivory Design Studio.

This meeting table is available in custom sizes and features a simple rectangular shape supported by two pedestals with access doors for cable management. The tabletop is crafted from natural wood veneer and includes a central pad equipped with a power intercept unit for added functionality.

Technical Specifications

Scale

Materials: *MDF with natural wood veneer, water base finish.*

Modular Meeting Table

Modular Meeting Table

Designed by: Ebony & Ivory Design Studio.

A classical design composed of modular units finished with natural Oak veneer to be added together with custom sizes and dimensions to form a board meeting table with a hollow center for the sake of enhancing visibility between the attendees. The table is always equipped with cable runners to solve wiring problems. The surface always has power intercept units and could also feature microphones ..etc. for modern day communication.

Materials : *MDF with natural wood veneer, water base finish.*

alfonso

TRAPEZOID

Trapezoid

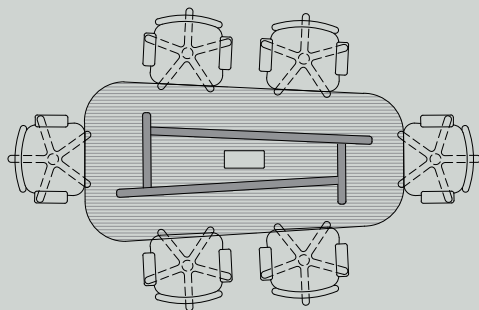

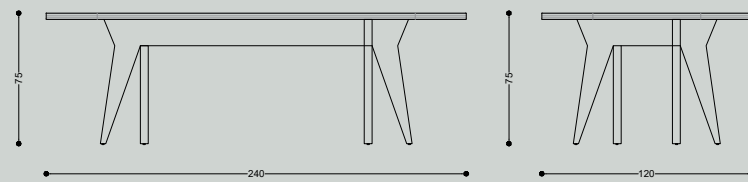

Designed by: Ebony & Ivory Design Studio.

This meeting table doubles as a creative architectural statement. Its slanted legs and unique assembly make a bold impression, further accentuated by the base's outline, which cuts through the surface and features a contrasting color for a decorative effect. The Trapezoid design serves as a focal point in any space, with the added functionality of a surface-mounted intercept unit equipped with power and data outlets.

Technical Specifications

Trapezoid

Materials: *MDF with natural wood veneer, powder coated lacquered wood, water base finish.*

WorkBench Meeting Table

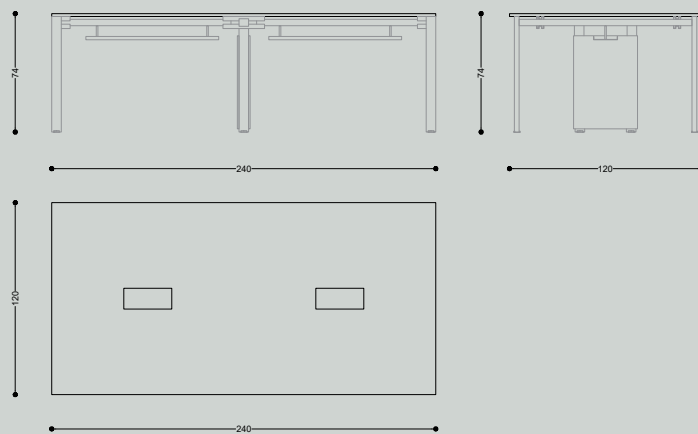

Designed by: Ebony & Ivory Design Studio.

A modular meeting table composed of the sturdy metal structure of the Work Bench metal support system. The modular nature offers diverse possibilities of size, shape and layout. This line's standout feature lies in its meticulously engineered metal components, ensuring robust mechanical fixation for enhanced durability and functionality. Depending on the layout and composition of the table cable management could be planned to maintain a clean organized appearance.

Technical Specifications

WorkBench Meeting Table

Designed by: Ebony & Ivory Design Studio.

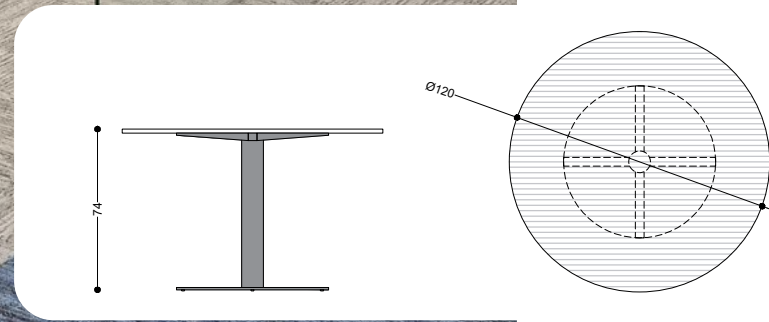

Materials: *MDF with high pressure laminate and 2mm PVC trims, metal base and structure with electrostatic finish*

WorkBench Round

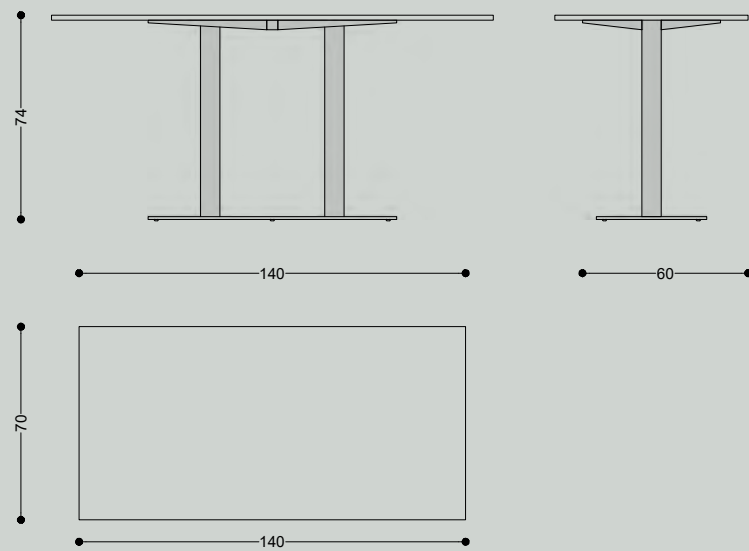

Designed by: Ebony & Ivory Design Studio.

The perfect proportion for a small meeting room, a round surface finished either in natural veneer or HPL supported on a stable monopod. The table could also be used to create a small meeting area in managerial rooms.

Polygon

Designed by: Ebony & Ivory Design Studio.

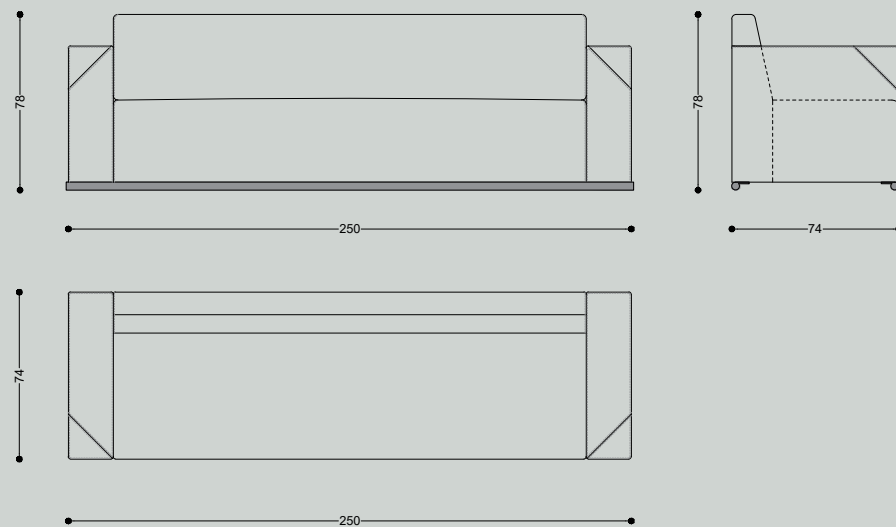

An outstanding geometric design with eye-catching architectural details, the body of the sofa is understated to provide comfort while sitting, whereas the arms really make a statement, adding an artistic flair to any space.

Polygon

Technical Specifications

Materials: Solid wood structure, zigzag springs, layered foam in different densities, fiber lining, fabric / leather.

Oud

Designed by: Ebony & Ivory Design Studio.

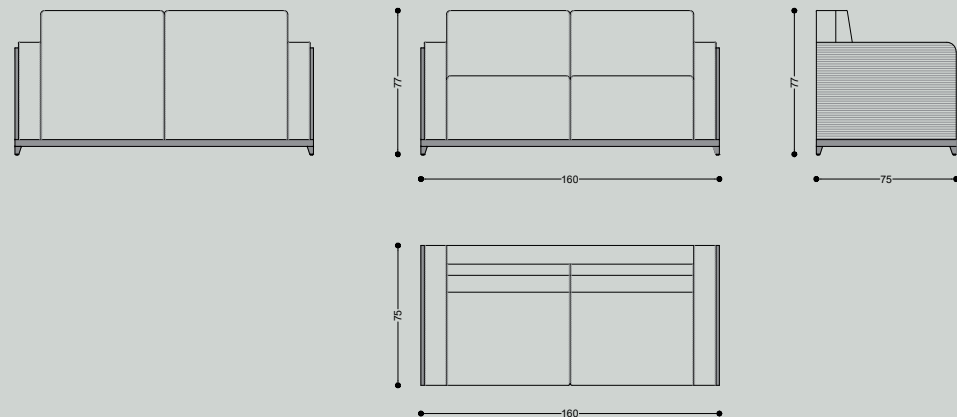

A beautiful sofa to view from all angles, back and sides are covered with natural wood veneer giving it richness and elegance. Oud is the perfect lounging piece of furniture for corporate space lounges, it also offers an interesting opportunity to be used as a free-standing object in the middle of a lounging space while it shows off the beauty of its natural veneer shell.

Oud

Technical Specifications

Materials: Solid wood structure, MDF with natural wood veneer, water base finish, zigzag springs, layered foam in different densities, fiber lining, fabric / leather.

Dash

Designed by: Ebony & Ivory Design Studio.

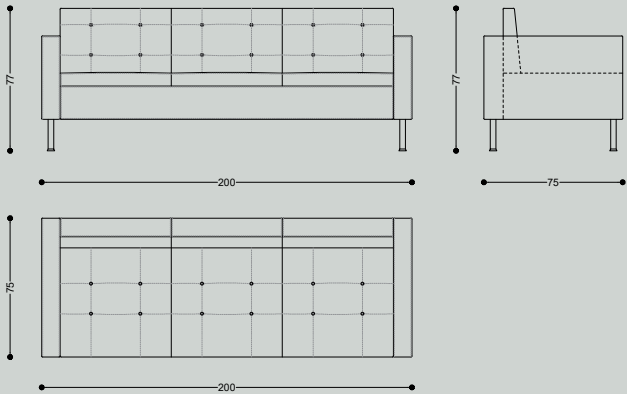

The Dash is the most popular sofa in the Alphabet office lounge collection. Its padded seat and back, combined with the elegant capitonné detailing, offer sophistication and style that surpasses the typical plain office lounge sofa. The seat and back cushions are crafted with upholstered wooden frames securely attached to the sofa's wooden structure, making them non-removable. The base is available in two options: solid hardwood or sleek stainless-steel legs.

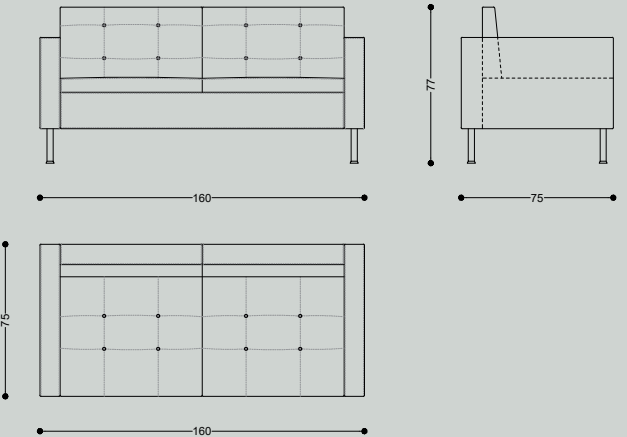

Dash

3 Seaters Sofa

2 Seaters Sofa

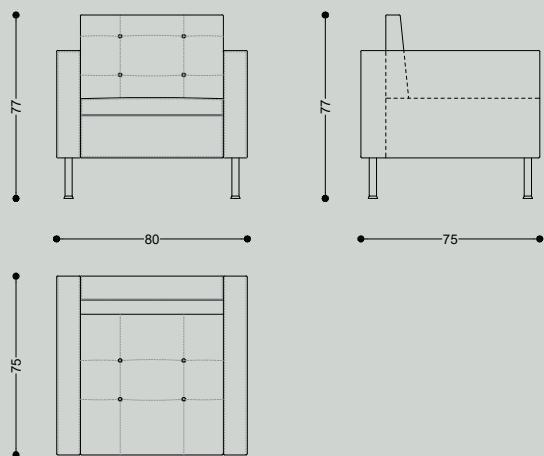

Materials: Solid wood structure, zigzag springs, layered foam in varying densities, fiber lining, fabric / leather, stainless steel legs.

Dash

Technical Specifications

Materials: Solid wood structure, elastic belts, layered foam in varying densities, and fiber lining.

TRIM

Designed by: Ebony & Ivory Design Studio.

Even though it's a cubic sofa which mainly intends to provide comfort, due to the careful design details done by rethinking all the relations between the back, the arms, the back cushions and the seat, this sofa ended up gaining substantial formality and elegance. The solid wood base of the sofa with the layering of the wood and the trim further add to the elegance and formality of the sofa, making it a perfect choice for salons and sophisticated public lounges.

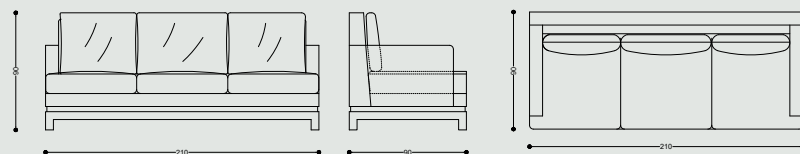

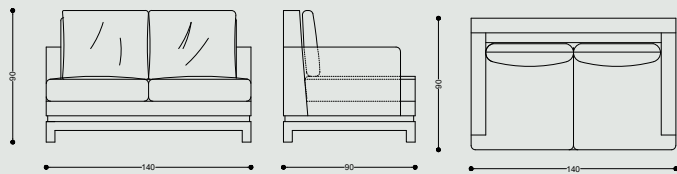

TRIM

Technical Specifications

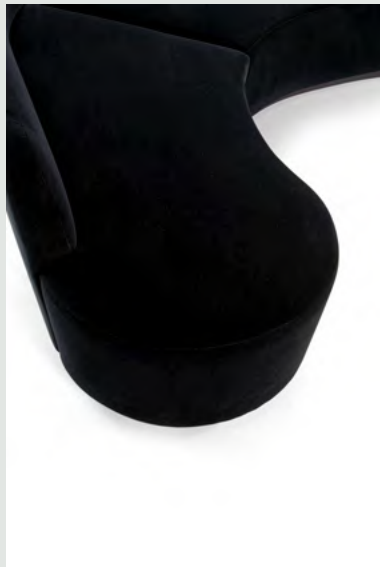

Materials: Hardwood base, solid wood structure, zigzag springs for the seat, elastic belts for the back, layered foam with various densities, dacron polyester fiber lining.

Twirl

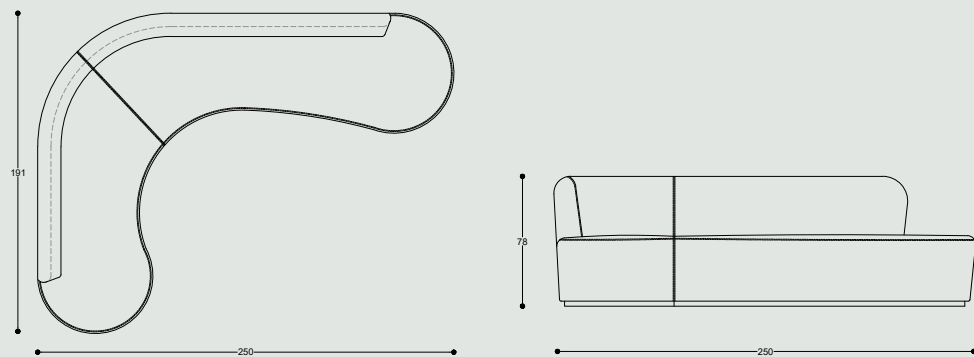

Designed by: Ebony & Ivory Design Studio.

A skillfully built organic looking L-shaped sofa. The shape offers flexibility when it comes to creating interior space layouts. The relation between the seat and back and the way all details and curves are designed and crafted give this piece a very aesthetically pleasing visual when viewed from all angles. Twirl is a lounging sofa that could be used in residential spaces as well as public areas and spaces where socializing is to be encouraged.

Technical Specifications

Twirl

Materials: *Hardwood base, solid wood structure, zigzag springs for the seat, elastic belts for the back, layered foam with various densities, dacron polyester fiber lining.*

Arc

Designed by: Ebony & Ivory Design Studio.

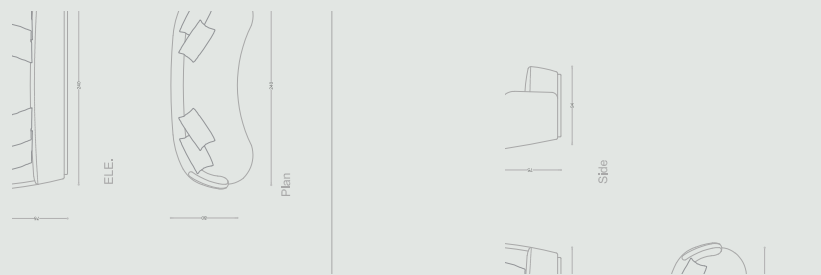

This elegant kidney shaped sofa with its curved front and back make it the perfect salon sofa due to its elegance and sophistication. Careful proportions and angles offer comfort and formality joined together. With its organic shape it's quite pleasing to the eye to view it from all angles, which makes it attractive if placed in the middle of a hall with its back exposed.

Arc

Technical Specifications

Materials: *Hardwood base, solid wood structure, zigzag springs for the seat, elastic belts for the back, layered foam with various densities, dacron polyester fiber lining.*

Spin

Designed by: Ebony & Ivory Design Studio.

Smooth curves form this outstanding organically shaped sofa. Skillfully assembled and crafted, this sofa offers different lounging experiences due to the irregularity of its width. Perfect when located in the middle of a lounging hall, mostly suitable for public areas and reception halls.

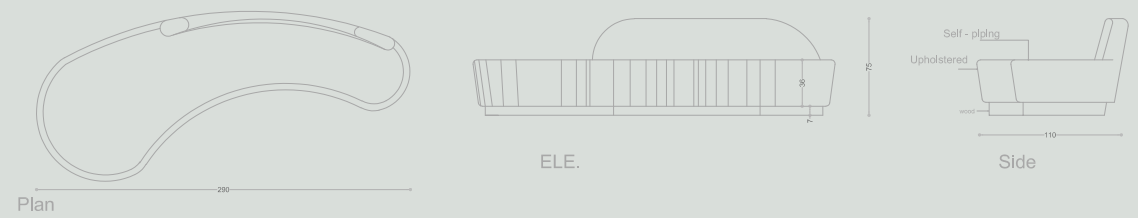

Spin

Materials: *Hardwood base, solid wood structure, zigzag springs for the seat, elastic belts for the back, layered foam with various densities, dacron polyester fiber lining.*

Technical Specifications

Ballast

Designed by: Monty Design.

The Ballast shares some design lines with the Vencedor executive desk, and complements the concept with automotive inspiration. Ballast means the element of stability, which is clearly visible by just looking at the sofa. It features a design element never before used in any sofa, which is that the armrests are surpassing the depth of the seat, which gives it that bold and stable look.

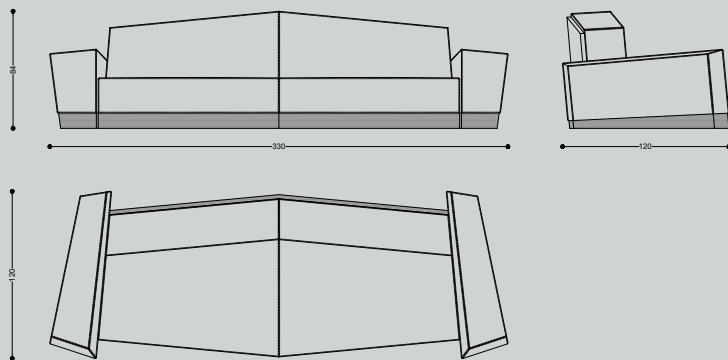

Ballast

Technical Specifications

Materials: Solid wood structure, zigzag springs, layered foam in varying densities, fiber lining, fabric / leather.

Dawn

Dawn

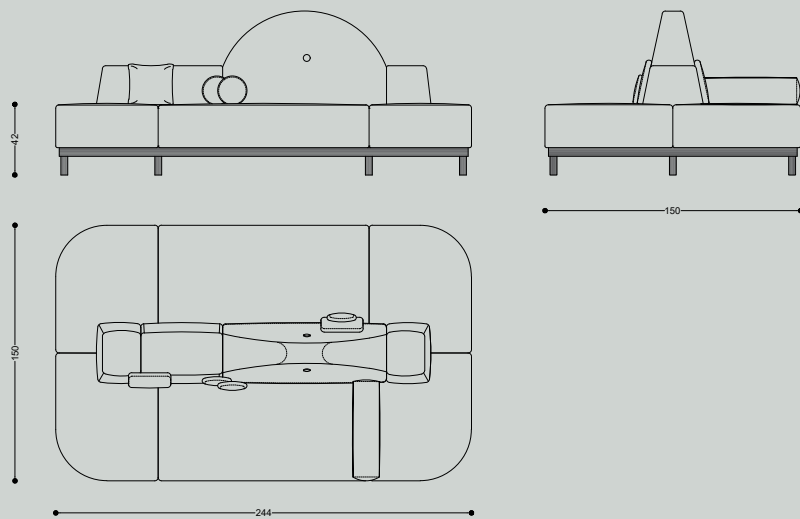

Designed by A for Architecture.

Dawn lounging set is inspired by Cairo's dawn moments, where the sun rises above the charming city. A main half circular upholstered back rest rises as a direct symbol of the sun amongst differently sized lower fixed back rests and other loose cushions, turning Cairo's chaos into a comfortable sofa.

Technical Specifications

Dawn

Materials : Solid wood structure, zigzag wires, layered foam in different densities, fiber lining, fabric or leather.

Alphabet OFFICE · Products

Technical Specifications

Abbas

Designed by: Ebony & Ivory Design Studio.

A comfortable lounging chair with subtle details. The design concept of Abbas is mainly based on the tapering of all its elements along with an upholstery technique that accentuates the puffiness of the foam padding. The end result is simple and comfortable as well as with character and strong presence.

Materials: Solid wood structure, zigzag springs, layered foam in different densities, fiber lining, fabric / leather, stainless steel legs.

Ali

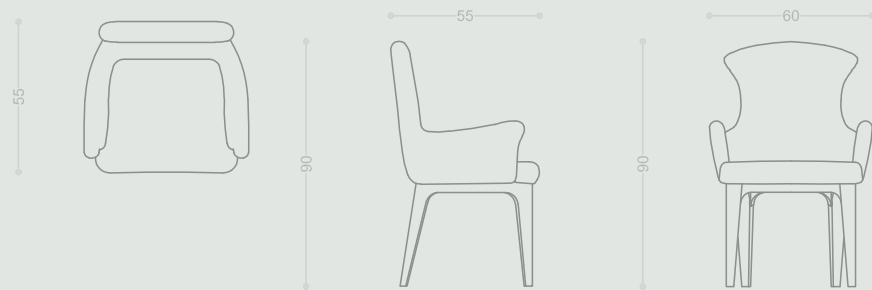

Designed by: Ebony & Ivory Design Studio.

Sleek curves cleverly proportioned to support the right posture while sitting and dining. This chair is quite often joined with Friend on the dining table. The curved outlines match easily, and the combination offers visual diversity on the dining table that is harmonious at the same time.

Technical Specifications

Ali

Materials: *Hardwood legs, plywood structure, elastic belts, layered foam with various densities, dacron polyester fiber lining.*

Scoop

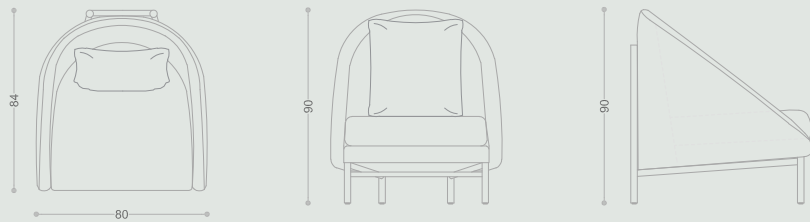

Designed by: Ebony & Ivory Design Studio.

An upholstered shell sitting on a hardwood stand that is considerably smaller. This chair has the visual appearance of a display item, just like an artifact is held on a stand at a museum. The angles and the slant of the back are worked out carefully to make it comfortable. This chair could be used in any interior wherever the designer decides to break from regular looking objects.

Technical Specifications

Scoop

Materials: Hardwood base, solid wood structure, zigzag springs for the seat, elastic belts for the back, layered foam with various densities, dacron polyester fiber lining.

Duetto

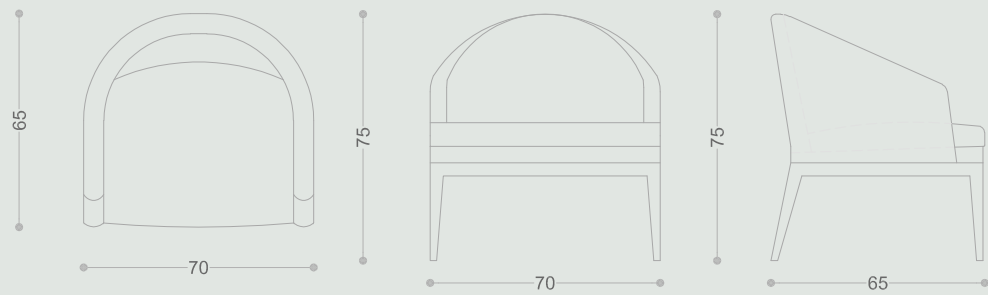

Designed by: Ebony & Ivory Design Studio.

The size of this chair is fitting somewhere between a big armchair and a small dining chair. The curving of the back and the way it joins into the arms of the chair, along with perfect slanting of the back offer a very comfortable lounging experience. Using this chair while furnishing a plan solves lots of problems whenever there is a space constraint just because of the small footprint it has. This chair could be used for both residential and contract spaces.

Technical Specifications

Duetto

Materials: *Hardwood base, solid wood structure, zigzag springs for the seat, elastic belts for the back, layered foam with various densities, dacron polyester fiber lining.*

Duetto II

Technical Specifications

Horse

Designed by: Ebony & Ivory Design Studio.

A feature pouf with an attached tablet, perfect for public areas. The detailing of the overlap between the tablet and the actual seat, with the repetition on of shape turn this pouf into an attractive visual gesture within any context.

Technical Specifications

Materials: *MDF with natural wood veneer, water base finish, foam padding, castors, fabric / leather.*

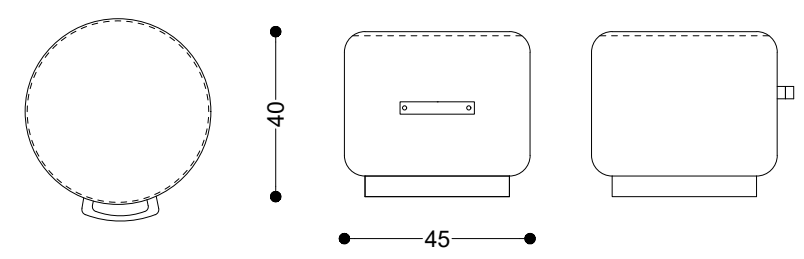

Case

Designed by: Ebony & Ivory Design Studio.

Technical Specifications

A simple round pouf with a basic cylindrical shape, the wooden base along with the wooden arms add character and give a chance to mix different finishes to make it stand out. The structure of the pouf is carefully engineered to make it sturdy yet light in weight at the same time. This simple furniture piece offers so much possibilities within any interior context.

Moon

Designed by: Ebony & Ivory Design Studio.

A circular pouf with the basic shape of a cylinder, the top cushion is made of an upholstered wooden frame fixed on the pouf for practicality. Full moon is an occasional piece within the office space, could be used anywhere, not necessarily the lounge. Having it on castors makes it easy to slide around for ease of movement.

Technical Specifications

Materials: Solid wood structure, plywood, elastic belts, layered foam in different densities, fiber lining, fabric / leather, castors.

04 | Tables

Zeppelin

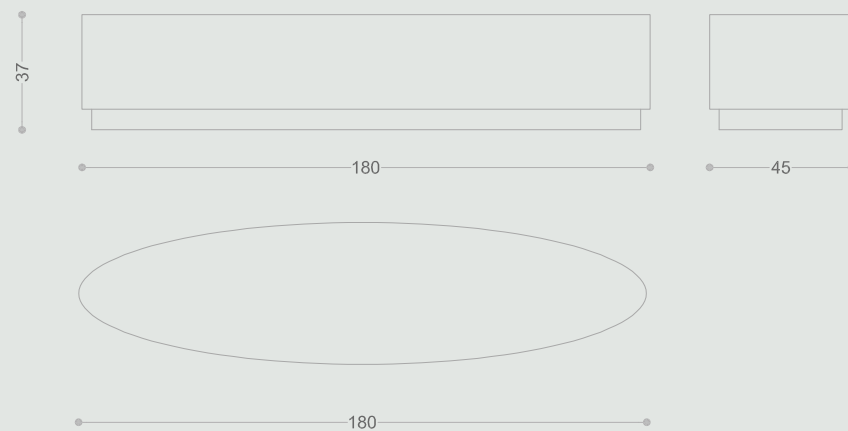

Designed by: Ebony & Ivory Design Studio.

A simple cylindrical shape. Due to the basic geometry of this table, it easily fits modern, traditional and contract spaces.

Materials: *Solid hard wood, natural wood veneer.*

Technical Specifications

Ray

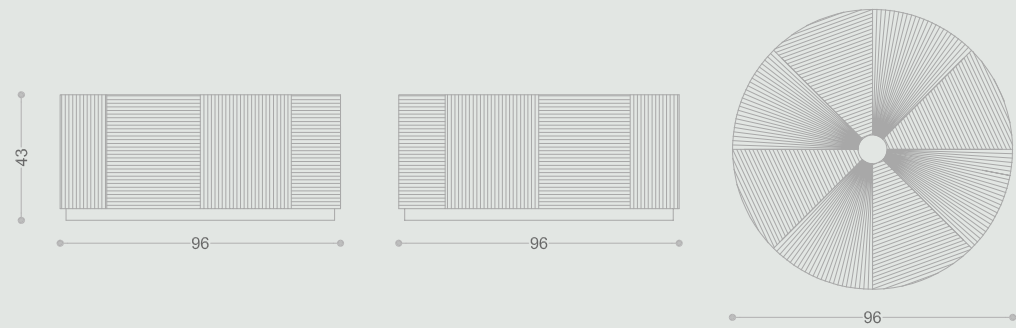

Designed by: Ebony & Ivory Design Studio.

This cocktail table is a marquetry masterpiece. A sun burst pattern spreading from the center of the table, travelling to the edge of the surface then again travels further down the body of the table till it reaches the base. The design shows off the craftsmanship used in production for a fully handmade piece. This table has strong presence anywhere, creating a very attractive focal point to any lounging space.

Technical Specifications

Ray

Designed by: Ebony & Ivory Design Studio.

Materials: *Solid wood structure, natural wood veneer.*

Wheel

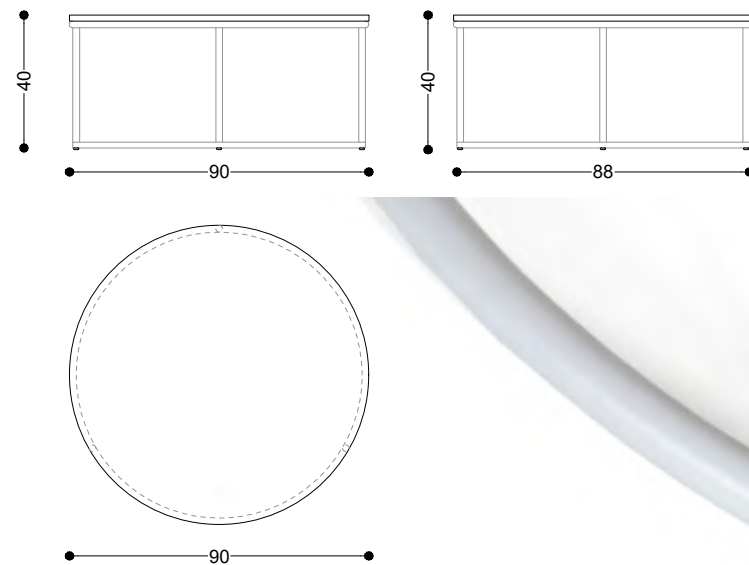

Designed by: Ebony & Ivory Design Studio.

A simple cylindrical metal shell, available in two diameters depending on whether it is a side table or a center table. The tubular frame of the metal shell adds an attractive basic retro feel to the table. Wheel could be used anywhere within an office space; it could also be used in public lounges and homes.

Materials: *MDF with high pressure laminate, metal base with an electrostatic finish.*

Technical Specifications

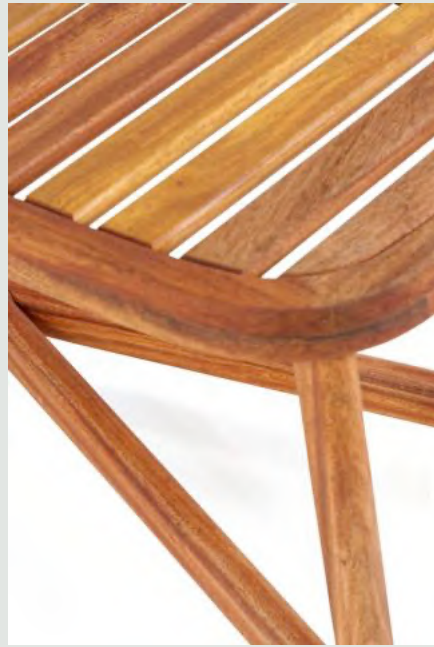

Skiff

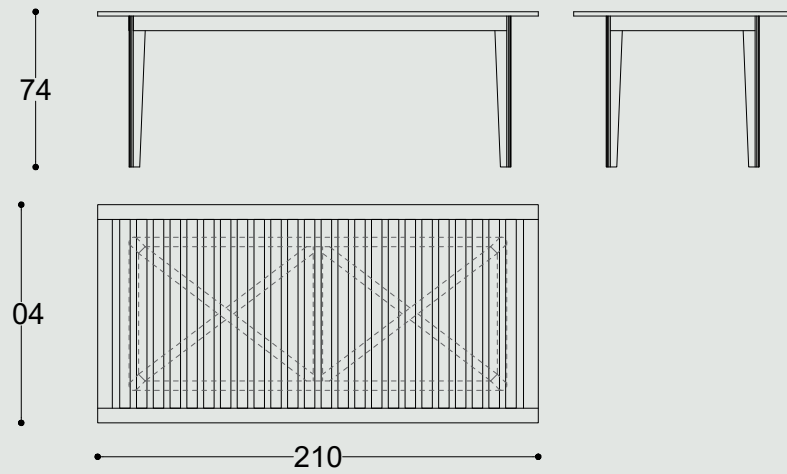

Designed by: Ebony & Ivory Design Studio.

A simple yet functional table made of solid Teak to make it suitable for the outdoors. The gaps in the surface are intentional for functional aspects. The Skiff table is best used with both the Skiff chair and the Skiff bench.

Technical Specifications

Skiff

Materials: Solid pitch pine structure and surface.

Crate

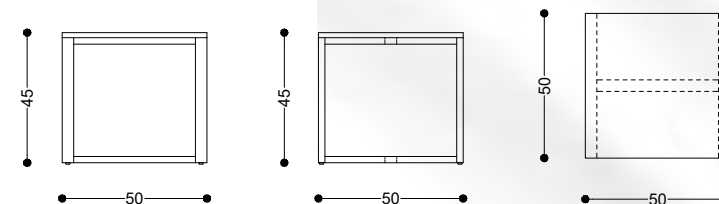

Designed by: Ebony & Ivory Design Studio.

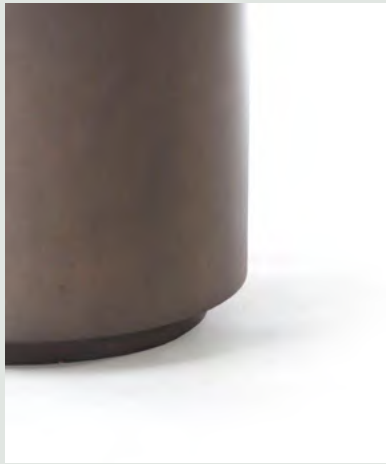

Materials: Solid beech wood, MDF with natural wood veneer, water base finish.

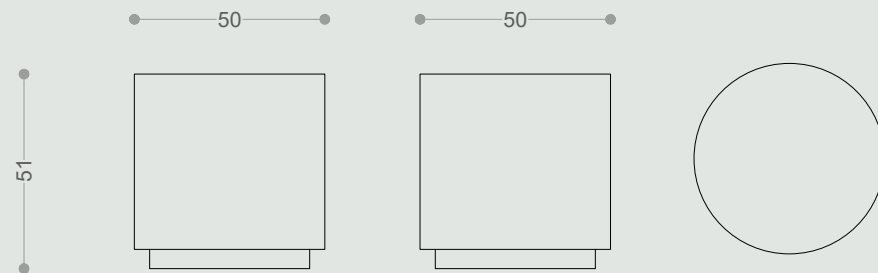

A square top with a basic chamfered wooden base supporting it. Because of the table fitting a clearly defined module, more than one could be added together to form a bigger array and create a big center table. This design is basic enough to fit both residential and contract spaces.

Technical Specifications

Technical Specifications

Drum

Designed by: Ebony & Ivory Design Studio.

A simple cylindrical shape. Due to the basic geometry of this table, it easily fits modern, traditional and contract spaces.

Materials: Solid hard wood, natural wood veneer.

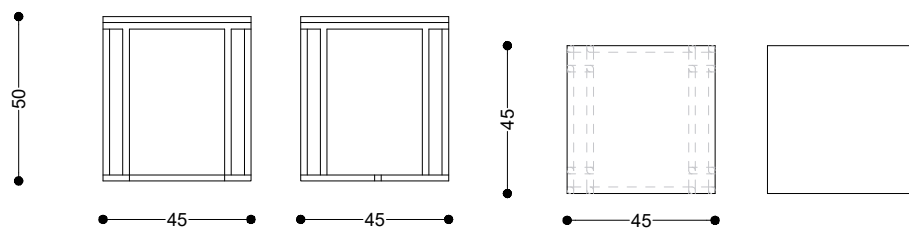

Forge

Designed by: Ebony & Ivory Design Studio.

The metal base is fully composed of 2cm x 2cm welded square sections, which makes this table look and feel quite sturdy even when the section used is quite thin. The vertical and horizontal parallel lines of the base render this table in basic geometric principles. The surface is made of natural wood veneer in a pattern that echoes the concept of the base by adding the two parallel lines made of another type of natural veneer.

Technical Specifications

Materials: *MDF with natural wood veneer, metal base.*

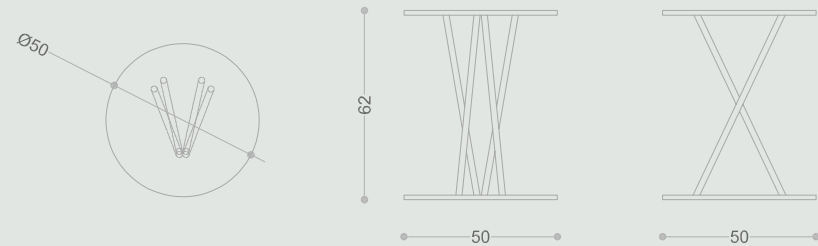

Scaffold

Designed by: Ebony & Ivory Design Studio.

The design concept is simple yet remarkable, the detail of the overlapping v-shaped supports is what gives this table character and sturdiness at the same time.

Technical Specifications

Materials:

Solid hard wood, MDF disks veneered in natural wood veneer.

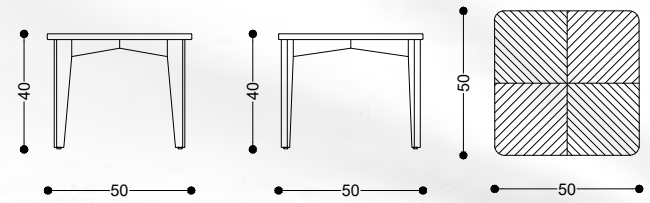

Hexa

Designed by: Ebony & Ivory Design Studio.

Materials: Solid ash base, surface covered with natural Walnut veneer.

Technical Specifications

A simple design, the surface has a basic shape, the whole concept of this table is done by the angles created with the legs along with their supporting brackets. This table could be used for both residential and contract spaces, available as both; a cocktail center table and a square-shaped side table.
